

Ethernet device

Kolver Ethernet Device (code 020075) makes it possible to connect a PC to any EDU 2AE/TOP - TOP/E - TOP/TA via remote LAN connection.

- EDU2AE/TOP: Screwing operation reports will be received on any LAN-connected PC
- EDU2AE/TOP/E & EDU2AE/TOP/TA: receipt of any screwing operation report and remote programming via EDU EXPAND on any LAN-connected PC.

Just connect the Ethernet device to the control unit (via serial cable) and to the net (via ethernet), then configure the device according to your LAN settings (via PC).
The device is supplied standard with serial cable and specific power supply.
